OBJECTIVE	A position that utilizes computational science and mathematical modeling to solve challenging, real-world problems in a stimulating and fast-paced environment.	
EDUCATION	University of Michigan <i>Ph.D</i> Nuclear Engineering and Radiological Sciences	Ann Arbor, MI Expected 2014
	Rose-Hulman Institute of Technology <i>B.S.</i> Mathematics <i>B.S.</i> Physics Minor: Computational Science Clarence P. Sousley Award for demonstration of exceptional performance in the mathematical sciences.	Terre Haute, IN May, 2010
SKILLS	<i>Programming Languages:</i> Python, R, Fortran, SQLite, bash scripting, L ^A T _E X, Matlab, Apache Pig <i>Libraries:</i> Numpy, SciPy, matplotlib, scikit-learn, BeautifulSoup, pandas, ggplot2 <i>Software:</i> Maple, Minitab, Dakota, Tableau <i>Operating Systems:</i> Unix, Windows, OS X <i>Machine Learning:</i> MapReduce, Neural Networks, Logistic/Linear Regression, SVM	
EXPERIENCE	<i>Research Assistant</i> University of Michigan, Department of Nuclear Engineering, Ann Arbor, MI	July 2010-present
	<ul style="list-style-type: none">• Developing, analyzing, and applying novel techniques for the uncertainty quantification of computer models for nuclear reactor core simulation.• Thesis work in the construction of surrogates for computer models with large numbers of correlated, stochastic inputs.• Coupled software to apply uncertainty quantification techniques to time-dependent reactor simulations in a parallel computing environment.	
	<i>Undergraduate Intern</i> Idaho National Laboratory, Idaho Falls, ID	Summer 2009
	<ul style="list-style-type: none">• Investigated effects of placing gas gap in irradiation capsule experiments at the Advanced Test Reactor.• Used finite element analysis to obtain a uniform specimen temperature profile by adjusting gas gap parameters.• Investigated the minimum size of coolant flow channel for design experiments needed to meet thermal-hydraulic safety requirements.	
	<i>Research Experience for Undergraduates</i> Brigham Young University, Department of Mathematics, Provo, UT	Summer 2008
	<ul style="list-style-type: none">• Researched Lagrangian formulations of mechanics with designer conservation laws.
